FRESENIUS KABI

Your Partner in Therapeutic Apheresis and Cell Collection

Fresenius Kabi is dedicated to empowering and supporting heath care professionals in their work to improve patient care. Together we are committed to making a positive difference with our technologies, training and support. Every patient. Every critical moment that matters.

Amicus® Separator

Therapeutic Apheresis and Cell Collection

Versatile in design, Amicus provides a multi-therapeutic platform to support your patient's individual needs. Advance your system with DXT® Data Management System, incorporating automated documentation and workflow traceability and data to assist in evaluating therapeutic apheresis procedures for patients.

Therapeutic Plasma Exchange
High plasma removal efficiency, accurate fluid balance control with realtime volume measurement[1]

Red Blood Cell Exchange
Precision red cell removal for Exchange, Depletion and Depletion/Exchange provides three different procedure options for treating your patients[2]

Multiple Options, Targeted Care

Mononuclear Cell Collection
High MNC collection efficiency with low platelet loss, flexible controls allow tailoring of MNC settings for targeted cell count based upon clinical need[3]

Platelets
High efficiency platelet collection, options for concurrent plasma, RBC collection and automatic PAS capability

Together with healthcare professionals, we are committed to making a positive difference with our technologies, training and support.
